

PROF. AMINE ALAOUI-BELGHITI

Professor at the National School
of Applied Sciences (ENSA), El Jadida,
Morocco

He is currently a Habilitated Research Professor at the National School of Applied Sciences (ENSA) of El Jadida, Morocco. He obtained his Ph.D. and Master's degrees in Materials Science and Energy from Chouaib Doukkali University, Morocco. Dr. Alaoui-Belghiti is a permanent member of the Engineering Sciences for Energy Laboratory (LabSIPE) and serves as a visiting researcher at Nicolaus Copernicus University in Toruń, Poland. He is also a member of the Chino-Moroccan Joint Laboratory, contributing to international research collaborations. His research focuses on solid-state hydrogen storage, energy harvesting using smart materials, self-powered systems, renewable energies, and energy storage technologies. As a dedicated researcher, he has published extensively in high-impact scientific journals and has actively contributed to numerous international conferences and events. In addition to his research activities, he is a member of the Scientific Committee and serves on the council of both the National School of Applied Sciences and Chouaib Doukkali University.
