

DR. SAMIR TOULI

Professor
The École des Hautes Études d'Ingénierie
Morocco

Is an Assistant Professor at the École des Hautes Études d'Ingénierie in Morocco, specializing in renewable energy systems and green hydrogen production. He holds a Ph.D. in Applied Physics and Engineering Sciences from the University Moulay Ismail of Meknès, with research focused on the techno-economic evaluation of solar hydrogen production in Morocco. He has published extensively in international journals and conferences on solar, wind, and hybrid energy systems, and completed a postdoctoral fellowship at the University Mohammed Premier in Oujda. In addition to his research, Dr. Touili has supervised several academic theses and contributed to the organization of scientific events promoting environmental education and sustainable technologies.
